

Are you a student looking for opportunities to boost your master degree with an exciting state-of-the-art nanotechnology project?

Are you triggered by applying nanotechnology in life science applications?

Have you checked out what Frontiers has to offer?

Fernando Mancilla says: "It was so great to participate in this exchange program, you learn a lot when travelling and interacting with other scientific groups in Europe. I had the opportunity to work with high level researchers and excellent multi-disciplinary group while doing the project for my master thesis."
